

AI Shortcut Examples — Day-to-Day Guide

60 practical examples (65–124) covering communication, business, research, finance, stocks, travel, sales, advertising, workflows, planning, customer handling, and everyday problem solving.

How to use: Copy the shortcut + prompt into ChatGPT or Cursor. Replace bracketed placeholders. For current/research-heavy topics such as markets, travel, laws, competitors, or prices, ask the AI to verify current information before relying on it.

65. ✉ Letter to a Bank

/letter /professional

Write a formal letter to my bank requesting [service/request]. Include the relevant account/loan context, be polite but firm, clearly state the action I want, and ask for written confirmation. Keep placeholders for private information.

66. ✉ Society Complaint

/letter /professional /firm

Write a formal complaint to my housing society about [issue]. State the facts, dates, impact, requested resolution, and a reasonable deadline. Keep the tone firm, factual, and non-aggressive.

67. ✉ University Request

/letter /professional

Write a formal email to my university requesting [certificate/extension/fee issue/admission matter]. Explain the situation clearly, make the requested action explicit, and include a polite closing.

68. ✉ Convert Rough Notes into a Formal Letter

/rewrite /professional /letter

Turn these rough notes into a formal letter. Preserve every important fact, remove emotional language, organize the facts chronologically, and clearly state the requested resolution:

[paste notes]

69. ⚖ Escalation Letter

/letter /firm /professional

Draft an escalation letter to [bank/company/society/service provider]. Summarize previous attempts to resolve the issue, identify what remains unresolved, request a specific resolution, and ask for a written response. Do not make legal threats unless supported by facts I provide.

70. ✉ Difficult Customer Reply

/customer /professional

A customer is angry about [issue]. Draft a response that acknowledges the concern, avoids admitting facts we cannot verify, explains the next action, gives a realistic expectation, and keeps the relationship positive.

71. 😡 Angry Customer — De-escalation

/customer /deescalate

Analyze this customer message and draft a calm response. Do not argue. Separate emotion from the actual problem, acknowledge the inconvenience, ask only necessary questions, and propose the next concrete step.

72. ✉ Sales Follow-up

/sales /whatsapp

Write a follow-up to a prospect who enquired about [product/service] but has not responded. Make it short, useful, non-desperate, and include one clear call to action.

73. 📄 Sales Call Script

/sales /script

Create a sales call script for [product/service]. Include opening, discovery questions, qualification, value proposition, objection handling, next step, and closing. Keep it conversational rather than robotic.

74. 📄 Lead Qualification

/sales /workflow

Design a lead qualification framework for [business]. Define lead stages, qualification questions, scoring criteria, follow-up timing, and when a lead should be marked lost or nurtured.

75. 📄 Follow-up Sequence

/sales /workflow

Create a 7-day follow-up sequence for a new lead using WhatsApp/email/call. Each touch should have a different purpose and avoid repeating the same sales pitch.

76. 📄 Sales Objection Handling

/sales /problem-solving

Give me responses to these objections: [too expensive / need to think / competitor / not now / send details]. For each, explain what the objection may actually mean and provide a natural response.

77. 📄 Advertisement Strategy

/advertising /strategy

Create an advertising strategy for [product]. Define target audience, problem, positioning, offer, creative angles, channels, funnel, landing page message, retargeting, and measurement plan.

78. 📄 Ad Hooks

/advertising /creative

Generate 30 attention-grabbing ad hooks for [product]. Create different angles: pain, curiosity, aspiration, fear of missing out, comparison, proof, education, and direct offer. Avoid false claims.

79. 📄 Ad Creative Brief

/advertising /brief

Create a creative brief for 5 ads. For each include hook, headline, visual idea, primary copy, CTA, target audience, and the problem it addresses.

80. 📄 Ad Performance Analysis

/advertising /analyze

Here are campaign metrics: [paste]. Analyze CTR, CPC, CPM, conversion rate, CPA and funnel drop-offs. Identify the most likely bottleneck and recommend the next 3 tests. Do not assume missing metrics.

81. 📝 Write a Blog Post

/blog /research

Write a useful blog post about [topic]. Define the audience, angle, structure, key arguments, examples, objections, and conclusion. If factual claims need current research, identify what must be verified.

82. 📝 Blog from Rough Ideas

/blog /rewrite

Turn these notes into a structured blog post. Keep my core ideas, improve flow, add headings, remove repetition, and clearly mark any claim that requires evidence:

[paste notes]

83. 📝 Research an Idea

/research /analyze

Research the idea: [idea]. Analyze market/problem, existing solutions, competitors, customer pain points, trends, business models, risks, and evidence. Separate facts, interpretations, and assumptions.

84. 📝 Validate a Business Idea

/research /problem-solving

Help me validate [business idea]. Identify the riskiest assumptions, cheapest experiments, target customers, interview questions, landing-page test, success criteria, and reasons the idea could fail.

85. 📝 Competitor Research

/research /compare

Compare these competitors: [list]. Analyze positioning, target customer, pricing, features, strengths, weaknesses, marketing, reviews/sentiment, and gaps. Clearly distinguish verified facts from inference.

86. 📝 Generate Business Ideas

/ideate /prioritize

Generate 20 business ideas around [skill/market/problem]. Score them on customer pain, willingness to pay, competition, startup cost, distribution difficulty, and execution complexity. Recommend the top 3.

87. 📝 Problem-Solving Framework

/problem-solving /analyze

Help solve this problem: [problem]. First define the problem precisely, identify symptoms vs root causes, list hypotheses, gather evidence needed, generate options, compare trade-offs, and recommend the next action.

88. 📝 Root Cause Analysis

/rootcause /problem-solving

Analyze this recurring problem: [problem]. Use 5 Whys and a cause/effect structure. Separate confirmed causes from hypotheses and propose tests that can confirm or reject each hypothesis.

89. ♾ Decision Matrix

/compare /recommend

I need to choose between [A/B/C]. Build a decision matrix using criteria: cost, effort, risk, speed, quality, scalability, and long-term value. Ask for missing weights only if necessary; otherwise state reasonable assumptions.

90. 📅 Prioritize My Work

/prioritize /plan

Here is my task list: [tasks]. Prioritize using impact, urgency, effort, dependencies, and risk. Return Now / Next / Later / Drop categories and explain the top decisions.

91. 📊 Personal Finance Review

/finance /analyze

Review this financial situation using only the numbers I provide. Analyze income, expenses, debt, emergency fund, insurance, investments, and goals. Identify gaps and priorities. Do not invent returns, tax benefits, or balances.

92. 🏦 Loan Comparison

/finance /compare

Compare these loan options using the supplied principal, interest rate, tenure, EMI, fees, and prepayment terms. Calculate total cost and key trade-offs. Do not assume missing charges or savings.

93. 📅 FIRE / Retirement Planning

/finance /plan

Help me analyze my retirement/FIRE plan using only the figures I provide. Show assumptions separately, calculate the deterministic scenarios, identify the gap, and suggest levers such as savings, expenses, debt, or retirement age. Do not guarantee outcomes.

94. 📈 Stock Research

/stock /research

Analyze [company/ticker]. Cover business model, revenue drivers, competitive position, risks, valuation considerations, recent developments, and key metrics. Clearly separate current verified information from analysis. This is research, not a guaranteed recommendation.

95. 📊 Compare Two Stocks

/stock /compare

Compare [Stock A] and [Stock B] for a long-term investor. Evaluate growth, profitability, debt, valuation, competitive advantage, management risks, cyclicalities, and major downside scenarios. State what evidence would change the conclusion.

96. 📰 Stock News Impact

/stock /research

Explain how this news may affect [company]: [news]. Separate immediate sentiment impact from fundamental business impact. Identify what is known, unknown, and what should be monitored before drawing a conclusion.

97. ✈ Itinerary Planner

/travel /itinerary

Create an itinerary for [destination] for [days]. Consider arrival/departure, travel time, geography, opening hours if known, budget, food, rest, and realistic pacing. Group nearby attractions together and avoid overpacking the day.

98. 🗺 Multi-City Trip Planner

/travel /itinerary /compare

Plan a trip covering [cities] for [dates/days]. Optimize the order to reduce travel time and cost. Include transport between cities, number of nights, daily plan, buffer time, and booking priorities.

99. 📊 Itinerary Optimization

/travel /optimize

Here is my itinerary: [paste]. Find unnecessary travel, backtracking, unrealistic timing, missing buffers, and overloaded days. Improve it without removing my must-visit places.

100. 🍽 Restaurant/Activity Selection

/travel /compare

I have [budget], [group size], and these preferences: [preferences]. Compare the options I provide on location, experience, value, timing, and suitability. Tell me which fits best and why.

101. 🔄 Build a Business Workflow

/workflow /architecture

Design a workflow for [business process]. Define trigger, inputs, steps, decision points, owners, status changes, exceptions, notifications, SLA, and completion criteria. Make it simple enough to implement.

102. 🔍 Improve an Existing Workflow

/workflow /analyze

Here is our current workflow: [paste]. Find bottlenecks, duplicate work, unclear ownership, unnecessary approvals, missing status transitions, and failure points. Propose a simpler workflow.

103. ⚙ Automate a Repetitive Process

/workflow /automation

I repeatedly do this process: [steps]. Identify which steps can be automated, which should remain human-controlled, required inputs, tools/integrations, exception handling, and expected benefit.

104. 📝 Create a Checklist

/checklist /steps

Create a practical checklist for [process]. Organize it into Before, During, After, and Final Verification. Make every item actionable and easy to tick off.

105. 📅 Weekly Planning

/plan /prioritize

Here are my goals and tasks for this week: [list]. Turn them into a realistic weekly plan. Protect time for important work, identify dependencies, and leave buffer for unexpected tasks.

106. 📅 Meeting Preparation

/meeting /research

Prepare me for a meeting about [topic]. Create objective, agenda, key questions, decisions needed, risks, data I should bring, and desired outcome.

107. 📅 Meeting Notes to Action Items

/meeting /document

Turn these meeting notes into decisions, action items, owner, deadline, dependencies, unresolved questions, and follow-up agenda:

[paste notes]

108. 📧 Professional Email

/email /professional

Write a concise professional email about [topic]. Make the purpose obvious in the first paragraph, include the requested action, relevant context, deadline if needed, and a polite closing.

109. 📱 WhatsApp Message

/whatsapp /short

Convert this into a natural WhatsApp message. Keep it concise, friendly, clear, and easy to read on a phone. Preserve the important details:

[paste text]

110. 📱 Social Media Content

/social /creative

Create 10 social posts about [topic/product]. Use different angles: education, story, problem, myth, tip, customer outcome, behind-the-scenes, question, comparison, and CTA.

111. 📄 Turn Research into an Executive Brief

/research /document /short

Turn this research into a one-page executive brief with: problem, key findings, evidence, implications, options, recommendation, risks, and next steps.

112. 📖 Learn a New Topic

/teach /simple

Teach me [topic] from beginner to practical level. Start with the mental model, then key concepts, simple examples, common mistakes, and a short exercise. Avoid unnecessary jargon.

113. 🗒️ Explain Something Simply

/eli5

Explain [topic] as if I understand the basics but am not an expert. Use a simple analogy first, then give the technically correct explanation and one practical example.

114. 🗒️ Fact-Check My Plan

/validate /critique

Here is my plan: [plan]. Challenge it. Identify hidden assumptions, weak evidence, missing dependencies, likely failure modes, and what I should verify before proceeding.

115. 🗒️ What Could Go Wrong?

/risks /problem-solving

For this plan: [plan], perform a pre-mortem. Assume it failed. List the most plausible reasons, early warning signs, prevention actions, and contingency plans.

116. 🗒️ 30-60-90 Day Plan

/plan /prioritize

Create a 30-60-90 day plan for [goal]. Define outcomes, milestones, weekly actions, dependencies, metrics, and what not to do. Keep the plan realistic.

117. 🗒️ KPI Dashboard Design

/analytics /workflow

Design KPIs for [business/process]. For each KPI give definition, formula, source, frequency, owner, target direction, and what action should be taken when it worsens.

118. 🗒️ Pricing Strategy

/pricing /strategy /compare

Help me price [product/service]. Analyze customer value, costs I provide, competitor positioning, packaging, discounts, psychological pricing, and risks. Give 3 pricing structures and recommend one.

119. 🗒️ Offer Design

/sales /advertising /strategy

Create a compelling offer for [product/service]. Define target customer, core promise, deliverables, proof, risk reversal, urgency without fake scarcity, price framing, and CTA.

120. 🗒️ Customer Feedback Analysis

/analyze /customer

Analyze these customer comments: [paste]. Group recurring themes, complaints, requests, positive signals, urgency, and likely root causes. Recommend the top product/business actions.

121. □ Customer Interview Questions

/research /customer

Create customer interview questions for [problem/product]. Avoid leading questions. Focus on actual past behavior, current alternatives, pain, cost, frequency, decision process, and willingness to change.

122. □ Customer Retention Strategy

/customer /strategy

Design a retention strategy for [business]. Identify reasons customers leave, early warning signals, onboarding improvements, engagement actions, win-back campaigns, and metrics.

123. □ Campaign Plan

/advertising /workflow /plan

Build a campaign from idea to launch. Include audience, offer, creative production, landing page, tracking, launch checklist, daily monitoring, optimization rules, and post-campaign analysis.

124. □ Turn a Goal into a Workflow

/goal /workflow /plan

My goal is [goal]. Convert it into measurable outcomes, milestones, recurring actions, decision points, reminders, metrics, and a weekly review process.
